BATS ALIVE!

Vicky Beckham Smith of A-Z ANIMALS presents a fascinating program about those night creatures people either love or hate....Bats!

Bats are the only mammals capable of true flight. With extremely elongated fingers and a wing membrane stretched between, the bat's wing anatomically resembles the human hand. Almost 1,000 bat species can be found worldwide. In fact, bats make up a quarter of all mammal species on earth! A little known fact is that the bat plays an important role in many ecosystems. They help to keep the populations of insects and bugs from getting too high & also help with pollination, something that the bees and birds are usually given all of the credit for. Bring along the family to see Vicki's live collection of bats!

Be sure to bring your own comfortable camp chair or blanket, as seating is limited. crafts/activities will follow @11:00

Date: Saturday, October 26, 2024

NOVEMBER

Serious Skills Series: Leaf Pounding Class

Hosted by DeSoto State Park. The Serious Skills series is a variety of classes and workshops that provide opportunities to discover a hidden talent or learn a new skill for personal enrichment. Classes are open to local residents, overnight guests, and park visitors.

Leaf pounding is a simple, stunning technique, historically used by Native American women to decorate fabric. Pounding with a rock or a hammer transfers the natural dyes of a leaf to fabric while retaining the design of the original leaf. In this class, join DeSoto State Park Naturalist Brittney Hughes on a quick walk to ID leaves that can be used for leaf pounding, then get a chance to unleash your creativity to make a beautiful and unique piece of fabric to take home. Participants can also bring their own fabric like t-shirts, handkerchiefs, pillowcases, etc. as long as it is 100% cotton. This class is for ages 8 to adult.

Date: Friday, November 1, 2024

Time: 3:00-5:00 p.m. (CST)

Where: DeSoto State Park in Fort Payne, Alabama. Meet at Lodge, in the pollinator garden.

Serious Skills Series: Flintknapping Workshop

Hosted by DeSoto State Park & Little River Arts Council

The Serious Skills series is a variety of classes and workshops that provide opportunities to discover a hidden talent or learn a new skill for personal enrichment. Classes are open to local residents, overnight guests and park visitors.

Delve into the ancient art of stone tool-making! Long ago, the earliest humans transformed simple pieces of stone into sophisticated tools that revolutionized their lives. Many people are familiar with stone artifacts such as arrowheads created by traditional cultures in North America and around the world. Uncover the secrets behind these ancient techniques and create your own stone projectile points, similar to those used by traditional cultures across North America and around the world.

About the class: Each student will be given a large piece of stone and, using a smooth cobble as a hammerstone, shown how to remove a "flake", or small piece. Next, they will be given a pressure flaker tool and instructed how to thin and shape their flakes into a finished arrowhead. Each student will have the opportunity to create several projectile points, and they will take home their finished pieces and the pressure flaker, as well as several additional flakes to complete on their own.

No prior knowledge of or experience with flintknapping is necessary. All materials and tools will be provided. Wear comfortable clothing suitable for hands-on activities.

Date: November 23, 2024

Time: 9:00-4:00 (CST)

Where: DeSoto State Park in Fort Payne, Alabama. Country Store & Information Center on Country Road 89.

Fee: \$85-includes all supplies. Class space is limited to 4, pre-registration is required for attendance in this class. Pre-registration: <https://www.littleriverartscouncil.org/flintknapping.html>

Civilian Conservation Corps History Hike: Morris Branch Bridge

This incomplete bridge stands as a powerful testament to the commitment of the CCC in advancing the development of DeSoto State Park. Between the mid-1930s and early 1940s, the CCC undertook various stone projects in the park, including the construction of this bridge over Morris Branch. Their ambitious goal was to establish a direct highway connecting DeSoto State Park to May's Gulf, which is today recognized as Little River Canyon. Regrettably, their honorable mission was left unfinished when the CCC disbanded in 1942. Take the opportunity to accompany DeSoto State Park staff as they delve into the history and significance of this remarkable endeavor. About the hike: the trail will be moderate, no major inclines, approx. 2 ½ miles total. Meet at DeSoto State Park Lodge and car caravan to the trailhead in the Little River WMA.

Hosted by DeSoto State Park & Little River Arts Council .

The Serious Skills series is a variety of classes and workshops that provide opportunities to discover a hidden talent or learn a new skill for personal enrichment. Classes are open to local residents, overnight guests and park visitors.

Create glue and cordage using only simple, natural elements! Scientists have written that cordage (string) and glue were not merely for making the lives of traditional cultures easier; they literally held their world together. In this workshop students will learn two important skills: how to process plant fibers to create cordage, and how to combine natural elements to create glue.

About the class: Part I is cordage, in which students will first learn how to refine the leaves and stalks from various plant species in order to expose the fibers. Next, students will be taught the reverse-twist method of creating actual cordage. Each student will take home the cordage strands they create, as well as extra material to process and twist on their own.

Part II is making pine-pitch glue, where students are provided three ingredients: charcoal, dried plant matter and pine sap. First, a minimal amount of processing will be done to break down and purify the ingredients. Then, students will melt the sap over a heat source and gradually add the other two elements. When the correct consistency is achieved, students will learn how to attach the liquified glue to the end of a small piece of wood for storage. Each student will take home several of these 'pitch sticks'. The workshop will culminate in students using their glue and cordage to haft a projectile point onto a river cane handle.
